

Blackbody Source Model 988

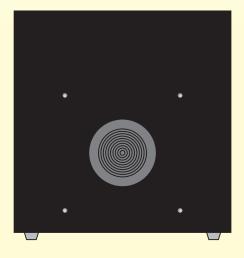

- 20°C to 45°C
- Emissivity better than 0.97 ±0.02
- Controller Resolution 0.01°C

This blackbody source has been introduced to meet the demand for a simple, cost effective but high accuracy calibrator for the calibration of thermal imagers and infrared thermometers used at temperatures around ambient.

A 70mm diameter ridged plate is heated or cooled with an internal solid state thermoelectric heat pump. The temperature of the plate can be set from 20°C to 45°C to a resolution of 0.01°C.

Evaluation showed the advantages of fitting a stainless steel tube around the plate to give better uniformity and less sensitivity to draughts and ambient temperature effects.

Model 988

Temperature Range 20°C to 45°C Resolution ±0.01°C

Target Size 70mm Diameter Emissivity 0.97 ± 0.02 Combined Accuracy $\pm 0.2^{\circ}\text{C} \ (\pm 0.3^{\circ}\text{F})$

/ Stability

Power 60 Watts
Voltage 12 Vdc
Dimensions H 230mm
W 225mm

W 225mm D 115mm 4kg

Optional PC Interface

Accessories

Weight

Switch Mode Power Supply Supplied as Standard 100 - 240 VAC

How to Order Model 988
